SELECTED TECHNICAL PROJECTS

Active Directory Domain Lab — Installed AD DS on Windows Server 2022, promoted DC01, created the lfagundes.local forest, verified DNS, and joined a Windows 10 client to the domain.

Linux Administration Lab — Provisioned users and a consultants group, enforced 30-day password aging, configured delegated access through /etc/sudoers.d, and validated permissions over SSH.

Network Design and Security Labs — Configured IPv4/IPv6 addressing, VLANs, routing, DNS, DHCP, and connectivity tests in Packet Tracer; hardened Wi-Fi with WPA3, guest isolation, and WPS disabled.

Security Analysis Labs — Traced phishing-email headers and reviewed SPF, DKIM, and DMARC indicators; demonstrated SQL injection risk and documented parameterized-query mitigation in controlled coursework.
